

Textbook DreamHome Case Study: Dreamhome database

Instructions to set up the database and load the data.

1. In KICT course repository, go to Documents folder,
2. Download “createDreamhome.sql” and save to your usb drive.
3. Click on “Run SQL command line” icon to run SQL*Plus.

Create user:

```
SQL> connect  
Username: system  
Password: db
```

```
SQL> create user section3 identified by section3;
```

```
SQL> grant connect, resource, create view to section3;
```

```
SQL> disconnect
```

Connect as the user :

```
SQL> connect  
Username: section3  
Password: section3
```

Create the database tables and insert data:

```
SQL> @ F:\createDreamhome.sql
```

Check all the tables created:

```
SQL> SELECT * FROM TAB;
```

Exit from SQL*Plus :

```
SQL> EXIT or QUIT
```
